Multi Quarter

Feature Guide — Product View Tab

ONMARK & UNITY GPO

...tracking value, together

Rebate contracts spanning multiple quarters, tracked as their own contract type

What This Tab Shows

Multi-quarter rebates are earned based on purchasing across multiple quarters combined, rather than resetting each quarter like a standard quarterly rebate. Some contracts are fixed-period; others are **rolling consecutive-quarter** contracts that continuously evaluate a trailing window. The **Multi Quarter?** filter on Product View (Quarterly / Non Quarterly / All) lets you isolate these.

Key Columns

Contract Name | Agg Level | Saving Type | Discount or Rebate | Contract Start/End Quarter | Common Units (Quarter) | Common Units Agg (Full Term) | Min Qty | Min GOB | Min Product Share | Shortfall Status | Saving %/$ | Inc Cost/Saving (Full Term) | ROI % (Full Term)

Quarterly Rebate vs. Multi-Quarter Rebate: A quarterly rebate resets each quarter based on that quarter's purchases alone. A multi-quarter rebate accrues over a longer period — either a fixed span or a continuously rolling window — and does not reset quarter to quarter.

Real Example: A rolling consecutive-quarter contract at Starling Onc Management

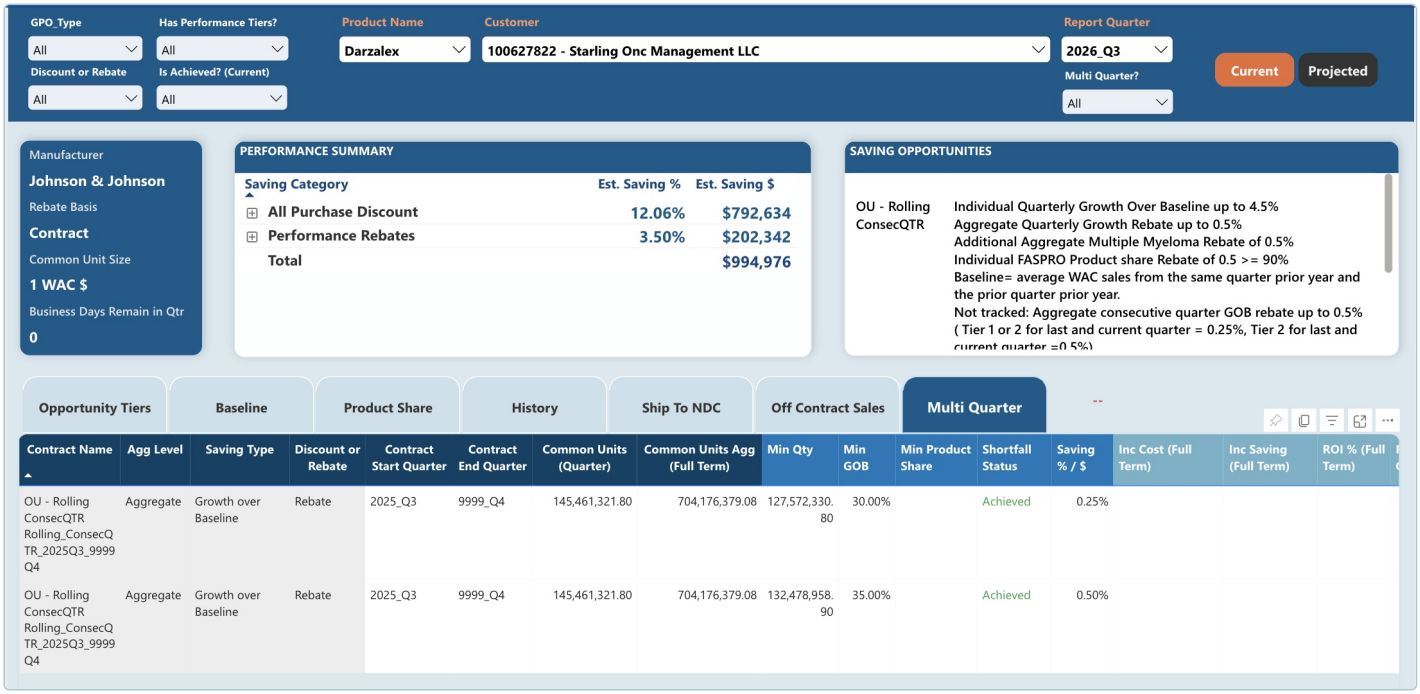

Customer 100627822 - Starling Onc Management LLC | Product: Darzalex | Manufacturer: Johnson & Johnson

Contract: OU - Rolling ConsecQTR Rolling_ConsecQTR_2025Q3_9999Q4 **Current view**

This open-ended rolling contract (2025_Q3 → 9999_Q4) shows two Aggregate tier rows, both **Achieved**: a 30.00% Min GOB tier with Min Qty **127,572,330.80** at 0.25% saving, and a 35.00% Min GOB tier with Min Qty **132,478,958.90** at 0.50% saving — on **704,176,379.08** common units (Full Term).

Why this matters: On a rolling contract, "9999_Q4" as the end quarter signals there's no fixed expiration — it's continuously evaluated on a trailing basis. This is a good customer example of sustained, long-term performance against an open-ended rebate program.

If the customer asks: "Does this contract ever expire?" → No — the open-ended "9999_Q4" end quarter means it's rolling and continuously evaluated, not a fixed term you need to renew.

Multi Quarter tab — Darzalex / Starling Onc Management. Rolling ConsecQTR contract, both tiers Achieved.
