Opportunity Tiers

ONMARK & UNITY GPO

...tracking value, together

Feature Guide — Product View Tab

Tier thresholds, shortfall, Days of Purchase, and ROI % for one product/customer

What This Tab Shows

Opportunity Tiers is one of the 7 tabs on the **Product View** page. It breaks a contract down into its individual rebate/discount tiers, showing exactly how much volume is needed to hit each one, and whether the customer has already achieved it.

Key Columns

Agg Level | Saving Type | Discount or Rebate | Common Units | Unit Per Day | Min Units at Tier | Min Volume | Min GOB | Min Product Share | **Days of Purchase** | Shortfall Status | Saving %/Fixed $ | Incremental Cost | Incremental Saving | ROI %

Days of Purchase

A prioritization metric showing the additional inventory needed to reach the next rebate opportunity, in days of normal usage.

```
Days of Purchase  =  Units Needed to Reach Next Tier  ÷  Average Units Purchased Per Day
```

Real Example: Darzalex's rebate tiers at Starling Onc Management

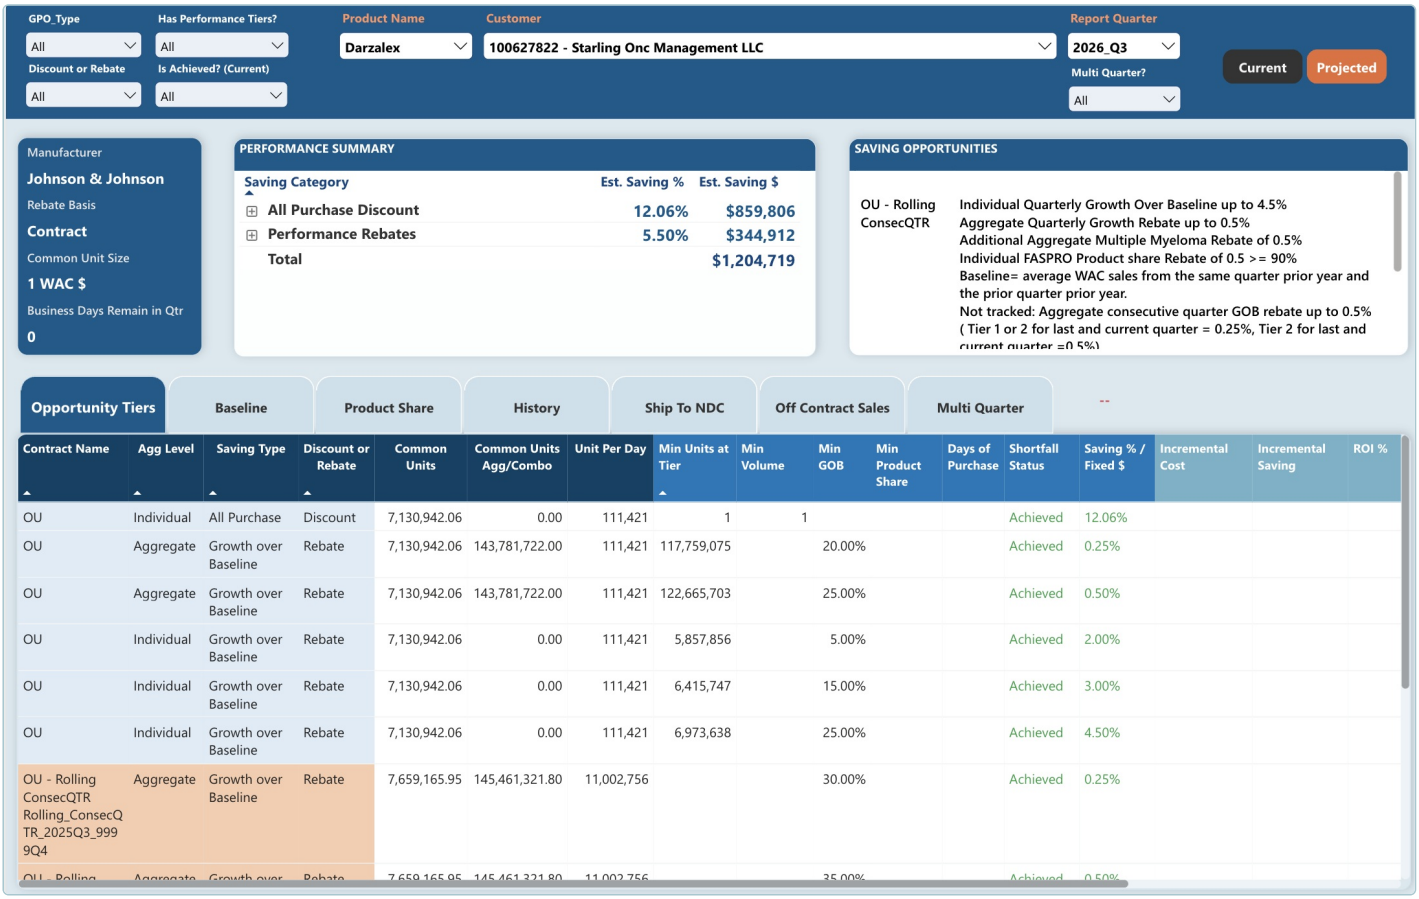

Customer 100627822 - Starling Onc Management LLC | Product: Darzalex | Manufacturer: Johnson & Johnson

Contract: OU **Current view**

Total savings here is **$1,204,719** — 12.06% All Purchase Discount ($859,806) plus 5.50% Performance Rebate ($344,912). Every tier row under the **OU** contract shows **Achieved**, including the Product Share tier and the two "OU - Rolling ConsecQTR" rows at the bottom of the list.

Why this matters: With every tier already achieved, this is a strong account to highlight in a QBR as a model of consistent performance — the conversation here is about protecting that performance, not chasing a gap.

> **If the customer asks:** "Are we at risk of losing any of these tiers?" → Check the Baseline tab's GOB % to see how much cushion exists above each threshold before assuring the customer their position is safe.

Contract Name	Agg Level	Saving Type	Discount or Rebate	Common Units	Common Units Agg/Combo	Unit Per Day	Min Units at Tier	Min Volume	Min GOB	Min Product Share	Days of Purchase	Shortfall Status	Saving % / Fixed $	Incremental Cost	Incremental Saving	ROI %
OU	Individual	All Purchase	Discount	7,130,942.06	0.00	111,421	1	1				Achieved	12.06%			
OU	Aggregate	Growth over Baseline	Rebate	7,130,942.06	143,781,722.00	111,421	117,759,075		20.00%			Achieved	0.25%			
OU	Aggregate	Growth over Baseline	Rebate	7,130,942.06	143,781,722.00	111,421	122,665,703		25.00%			Achieved	0.50%			
OU	Individual	Growth over Baseline	Rebate	7,130,942.06	0.00	111,421	5,857,856		5.00%			Achieved	2.00%			
OU	Individual	Growth over Baseline	Rebate	7,130,942.06	0.00	111,421	6,415,747		15.00%			Achieved	3.00%			
OU	Individual	Growth over Baseline	Rebate	7,130,942.06	0.00	111,421	6,973,638		25.00%			Achieved	4.50%			
OU - Rolling ConsecQTR Rolling_ConsecQTR_2025Q3_9999Q4	Aggregate	Growth over Baseline	Rebate	7,659,165.95	145,461,321.80	11,002,756			30.00%			Achieved	0.25%			

Opportunity Tiers tab — Darzalex / Starling Onc Management. All tier rows show Achieved, total savings $1,204,719.

Metric Formulas

These formulas drive the Opportunity Tiers, Multi Quarter, and Opportunity Highlights calculations across the tracker.

Metric	Formula
Unit Per Day	Quarter-to-date units ÷ business days passed
Days of Purchase (DoP)	Shortfall ÷ Unit Per Day
Incremental Cost	Contract unit cost × Shortfall
Incremental Saving	(Next tier saving % − Current saving %) × Rebate unit cost
ROI %	Incremental saving ÷ Incremental cost
Rebate Unit Cost	WAC price ÷ Common units *(or Contract price ÷ Common units, depending on rebate basis)*

How to Read the Opportunity Quadrants

High ROI / Low DoP
Act now — near-term and high return.

Low ROI / Low DoP
Limited upside.

High ROI / High DoP
Good value, but not short term.

Low ROI / High DoP
Low priority.

GPO Type
Onmark is the Oncology GPO, and **MSPL** is the Multispecialty GPO. Selecting one limits the Product Name slicer to that GPO's products.

Has Performance Tier
"All Purchase Only" limits products to those with All Purchase Discount and/or Rebate (no performance-tier structure).
