Feature Guide — Product View Tab

Contracted product volume vs. competitor volume, for one customer

What This Tab Shows

Product Share compares a customer's purchases of the contracted product against any competing products they're also buying — both current and projected, individual or aggregate — plus a breakdown of exactly which competitor products make up that volume.

Key Columns

Contract Name | Agg Level | Common Units Qty Ind/Agg | Competitor Units Ind/Agg | Common/Competitor Units Proj Ind/Agg | **Product Share %** + a separate **Competitor Units Breakdown** table listing each competing product by name

Real Example: Darzalex at Starling Onc Management — just under a key threshold

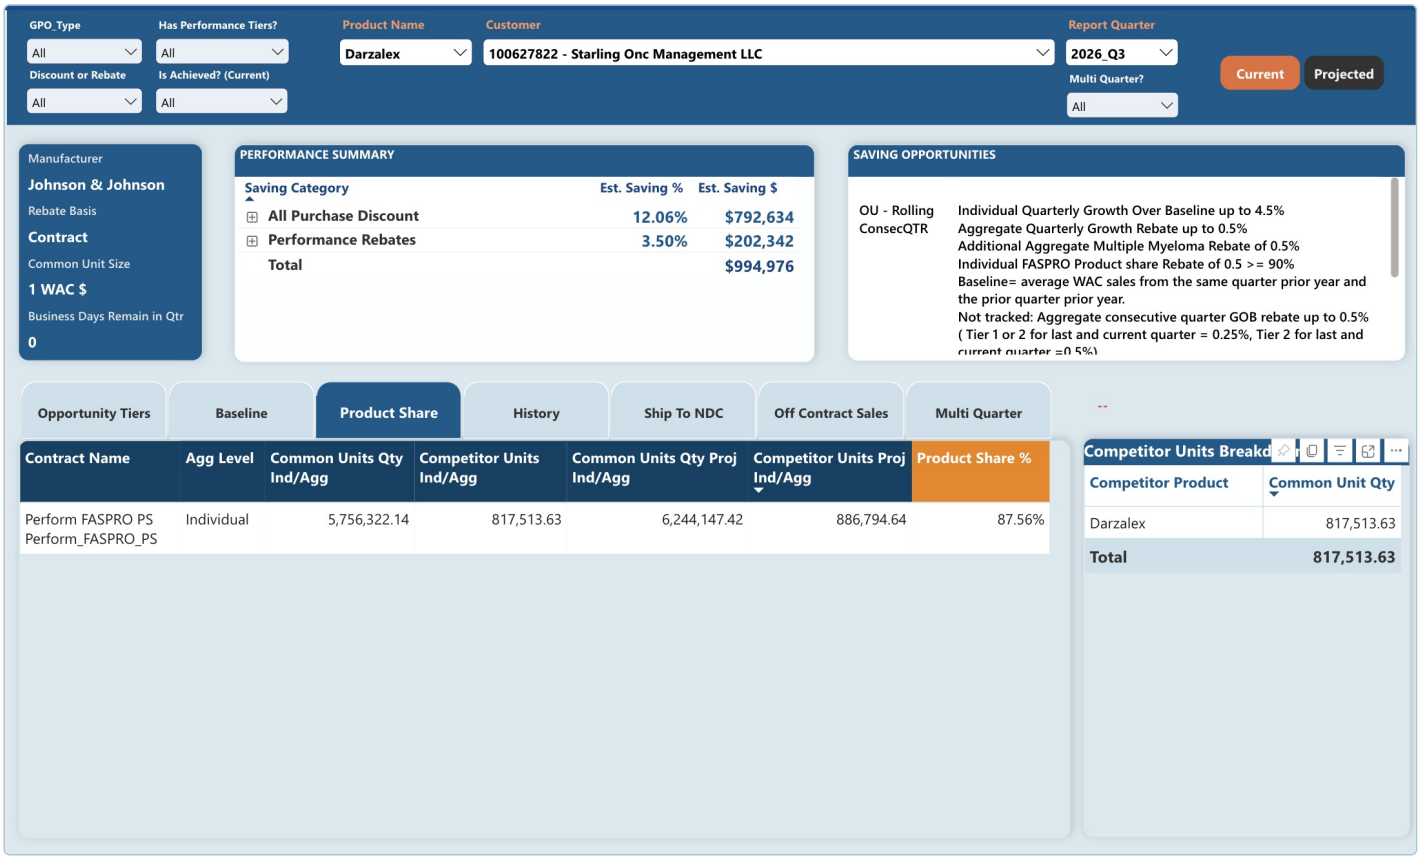

Customer 100627822 - Starling Onc Management LLC | Product: Darzalex | Manufacturer: Johnson & Johnson

Contract: Perform FASPRO PS **Agg Level: Individual** **Current view**

Common Units Qty: **5,756,322.14**. Competitor Units: **817,513.63**. That works out to a **Product Share of 87.56%**. The Competitor Units Breakdown table confirms all 817,513.63 competitor units are attributed to a single competing product.

Why this matters: The Saving Opportunities panel on this same page states: "*Individual FASPRO Product share Rebate of 0.5% >= 90%.*" At 87.56%, this customer is just 2.44 percentage points short of qualifying for that additional 0.5% rebate — a small, concrete, and very actionable gap to raise directly.

> **If the customer asks:** "How much would closing that gap be worth?" → Pull the customer's total Darzalex spend and apply the additional 0.5% rebate rate to estimate the dollar impact — a compelling number for a focused conversation about shifting the remaining competitor volume.

Product Share tab — Darzalex / Starling Onc Management. 87.56% share, just under the 90% rebate threshold referenced in Saving Opportunities.
