Ship To NDC

ONMARK & UNITY GPO

...tracking value, together

Feature Guide — Product View Tab

Drilling from product/NDC down to ship-to account and invoice-level detail

What This Tab Shows

Ship To NDC is the most granular tab in Product View. It drills from a product's Material Description and NDC, down through each Ship To account, down to individual invoices and dates — including a **Ship To Rebate Eligible?** flag.

Key Columns

Material Description | NDC | **Ship To Rebate Eligible?** (Y/N) | SAP Invoice Qty | Sales Common Qty | % Sales Common Qty (expandable to individual Ship To accounts and invoice rows)

Real Example: A fully rebate-eligible account spread at Infusion Express

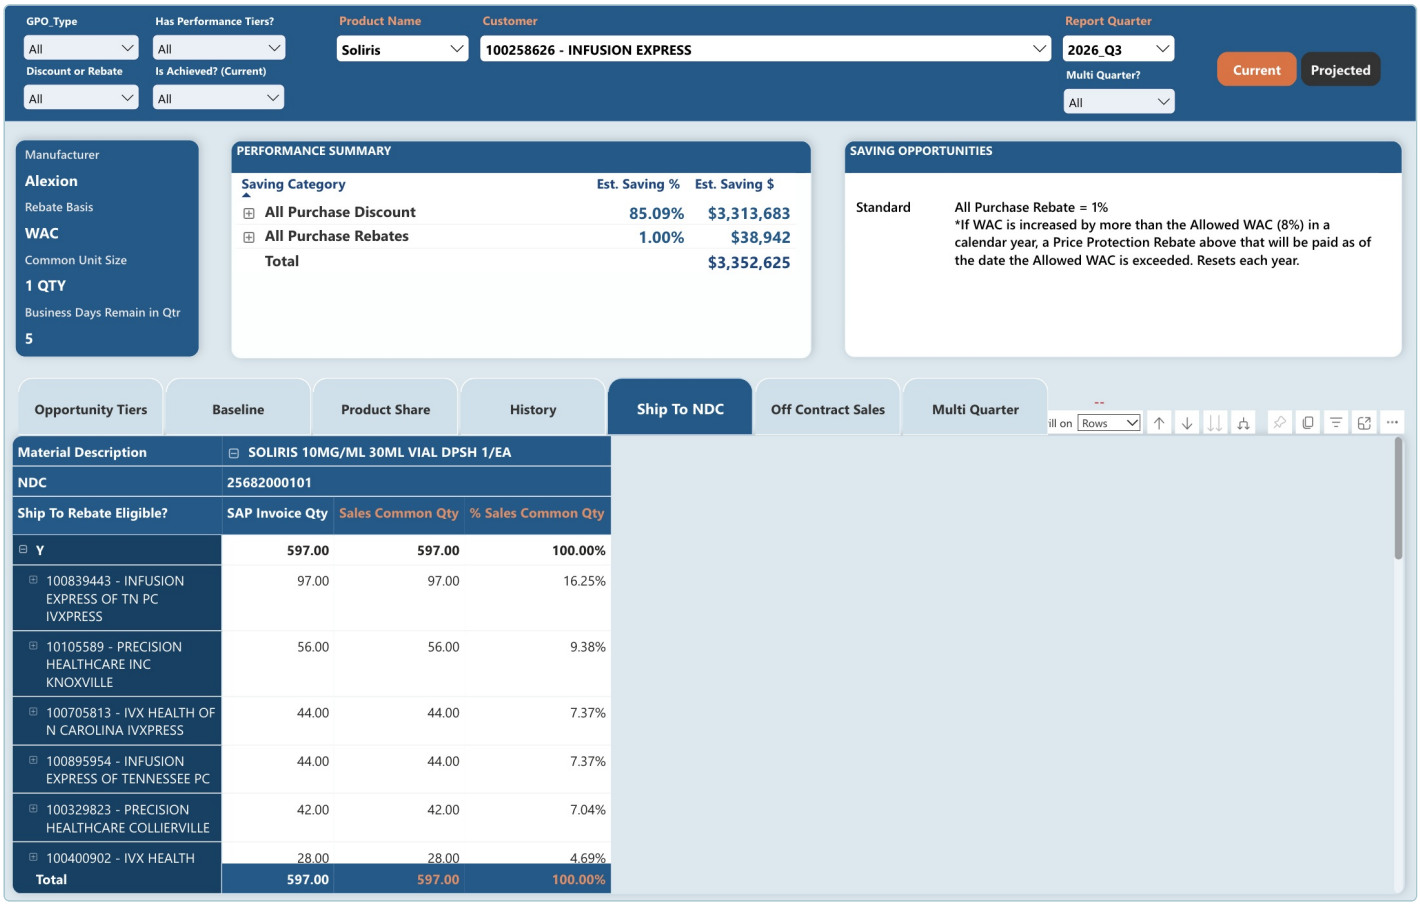

Customer 100258626 - Infusion Express | Product: Soliris | Manufacturer: Alexion

NDC: 25682000101 (SOLIRIS 10MG/ML 30ML VIAL DPSH 1/EA) **Ship To Rebate Eligible? = Y (100%)**

Every shown ship-to account is flagged **"Y"** for Ship To Rebate Eligible — **597.00 total units**, 100% eligible. The top account, **100839443 - Infusion Express of TN PC IVXpress**, carries **97.00 units (16.25%)**, followed by **10105589 - Precision Healthcare Inc Knoxville** at 56.00 units (9.38%).

Why this matters: A clean 100% eligible spread like this is the ideal state — every account's purchases are counting toward the rebate, with no off-contract leakage to chase down.

> **If the customer asks:** "Are all our locations set up correctly?" → Yes — with every row flagged Y, there's no eligibility gap to fix here, unlike customers with mixed Y/N flags.

Ship To NDC tab — Soliris / Infusion Express. 597 total units, 100% Ship To Rebate Eligible across all shown accounts.
